

Classifying triangles

The seven types of triangle can be [classified](#) (grouped) according to their sides or interior angles as shown below. Click on any triangle to go to its detail page.

Classification of triangles by sides

Equilateral	Isosceles	Scalene
		
3 sides equal	2 sides equal	No sides equal

Classification of triangles by angles

Right	Equiangular	Acute	Obtuse
			
One angle exactly 90°	3 angles equal	All 3 angles less than 90°	One angle more than 90°
