

## **Chapter 11: Three Dimensional Geometry**

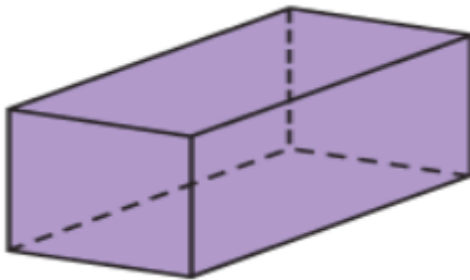

**Cube-** a square three-dimensional shape such as a box

**Cylinder-** a three-dimensional shape with flat circular ends and a curved surface such as a tube

**Rectangular prism-** a rectangular three-dimensional shape such as a brick

**Cone-** a three-dimensional shape with a round base and a point at the top

**Curved surface-** a rounded surface

Some solids have a **curved surface**.

**Flat surface-** a level surface

**Sphere-** a round three-dimensional shape such as a ball
