

### Laboratory Report

Saranac Central School Dist.	200485
P.O.Box 8	
Saranac, NY 12981	
Atten: Jamie Giroux	

PROJECT: Lead in Schools,Saranac MS/HS  
WORK ORDER: **1610-22529**  
DATE RECEIVED: October 03, 2016  
DATE REPORTED: December 16, 2016  
SAMPLER: Charlie Perry

Enclosed please find the results of the analyses performed for the samples referenced on the attached chain of custody located at the end of this report.

The column labeled Lab/Tech in the accompanying report denotes the laboratory facility where the testing was performed and the technician who conducted the assay. A "W" designates the Williston, VT lab under NELAC certification ELAP 11263; "R" designates the Lebanon, NH facility under certification NH 2037 and "N" the Plattsburgh, NY lab under certification ELAP 11892. "Sub" indicates the testing was performed by a subcontracted laboratory. The accreditation status of the subcontracted lab is referenced in the corresponding NELAC and Qual fields.

This NELAC column also denotes the accreditation status of each laboratory for each reported parameter. "A" indicates the referenced laboratory is NELAC accredited for the parameter reported. "N" indicates the laboratory is not accredited. "U" indicates that NELAC does not offer accreditation for that parameter in that specific matrix. Test results denoted with an "A" meet all National Environmental Laboratory Accreditation Program requirements except where denoted by pertinent data qualifiers. Test results are representative of the samples as they were received at the laboratory.

Endyne, Inc. warrants, to the best of its knowledge and belief, the accuracy of the analytical test results contained in this report, but makes no other warranty, expressed or implied, especially no warranties of merchantability or fitness for a particular purpose.

## Sampling Instructions – Lead Sampling in Schools

A sample must be collected after water has been sitting in the pipes for an extended period of time. A minimum 8-hour period during which there is no water use must be achieved prior to drawing the water for the sample. Due to this requirement, it is recommended that the sample be collected before the facility is open and before any water is used that day from Any tap. The collection procedure is described below:

1. Wait a minimum eight (8) hour period during which there is no water use to be sure stagnant conditions exist (this includes toilets). Collect all water samples before the facility is open for the day and before any water is used. The water should be sitting stagnant in the pipes for at least 8 hours, but not longer than 18 hours (unless it's normal for those sites to be unused for longer periods of time).
2. Do not remove the screen or tip of the tap that you are sampling from.
3. Place the bottle below the faucet and open the COLD water tap all the way. Fill the bottle to the bottom of the cap. There MUST be at least 250mL for the sample to be analyzed, but the bottle should not be filled much past that line. Do NOT overflow the bottle! Tightly cap the sample bottle.
4. Label the bottle clearly and make sure the same ID is used on this form and the Chain of Custody (COC). Fill out the information at the bottom of this form completely. Contact your water operator or the lab if you have any questions.
5. Samples MUST be delivered to the lab within 5 days of collection. They do not need to be on ice.

Water Last Used: Date: September 30, 2016 Time: 11:00pm

Sample Collected on: Date: October 1, 2016 Time: 7:00am - 3:38pm

This sample is a (check one):

First Draw       Flushed Line(\_\_\_\_minutes)       Follow-Up

Sampling Site ID / Site Number: #1 - 148

Manufacturer of outlet (optional): \_\_\_\_\_ Model #: \_\_\_\_\_

Maintenance since last sampling: Yes / No, If Yes then what: \_\_\_\_\_

***I attest that I followed the instructions on this sheet and that all of the information on this sheet is true and complete to the best of my knowledge:***
